UNIVERSITY OF SYNTHESIS
Steps to Gen-ethics
of human trans-finite functions

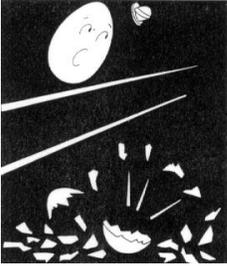

Excerpt from
*Universidad de Síntesis. Pasos hacia una Gen-ética
de funciones humanas trans-finitas*

Translation by Héctor V. Morel

Steps to gen-ethics of human trans-finite functions

Sign of our time:

Existential crisis,
loss of image in the world

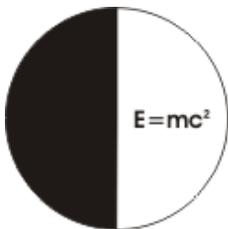

LOST UNITY

Symmetry break.
Irreversible fall.
Initial conditions forgotten.
Concealment of being.

**“Neither knights of the king,
nor men of the king
were able to assemble
Humpty Dumpty again.”**

But, what about the King?
It is the end of history?, or the end of a story?

Crisis of foundation,
where to rest one’s head?

In equation relativity,
values of man,
time of life,
history of the universe
are left.

A FRONTIER HARD TO CROSS

Einstein revealed us a unknown
world, but only gave us
“a half of the formula”.

Later other names and other formulas would come

Planck	$\hbar = 6,77 \times 10^{27}$	(action quantum)
De Broglie	\hbar $\lambda = \frac{\hbar}{mv}$	(pilot waves)
Heisenberg	$pq = qp$	(uncertainty principle)
Schrödinger	$\hat{H}\varphi = E\varphi$	(wave equation)
Dirac	$+m = -m$	(anti-particle physics)
Boltzmann	$S = k \log P$	(entropy production)
Prigogine		(self-organizing)

But again and again, the long-awaited unified field equation is beyond our reach.

Anyway, now in the threshold of the twenty-first century,

what is our greatest conquest for the progress of science and technique?

–Today, to have attained by ourselves the farthest reaches
of both philosophic and scientific knowledge.

A frontier that is hard to cross!

And now, what?

The cosmic man is born

*He reveals himself
like an event*

*He hides
like a form*

*Ancient myths
have given a face to the Plumed Serpent,
but the spacesuit of the astronaut
is just a prelude to a body of fire.*

Or the advent of the new

Nicodemus' question:

“How can a man be born when he is old?, can he enter the second time his mother's womb, and be born?”

Physiochemistry and biology do not give the answer, but help us to understand: in unstable systems, in critical points far away from balance, eventually an enlarged fluctuation can break symmetry and give rise to entirely new structures (Prigogine).

*In the world there is something new.
The cosmic man is born.
We need a science to explain it.*

**Two ways
in Chartres Labyrinth**

Two currents
in Jacob's scale.

Double helix
in DNA molecule.

SYNTHESIS

The unified field formula between
knowledge and Life does not come
through the way of science but through
the way of man,

because unity of man is
before unity of science.

The Heart of man can establish again the bridge
between laws of time and mystery of eternity.

It is a new rhythm,
a new *Synthesis*.

The word **synthesis** is equivocal as a concept, but
fertile as a symbol.

Trans-finite function of a human heart, which starts
producing fusion energy.

Reversibility of values.

Arkhi-techtonic Design

NEW UNIVERSITY MASTERSHIP

Sooner or later,
somewhere on Earth,
we should start all anew.

The point is not to convey information (informatics webs tend to it) but to assure circulation of goods of life (so that human energy may not decline:

trans-mission of a new Mastership.

Pedagogy of Synthesis

A professional and technical University has answers to knowledge and power, but does not to man.

We start discovering how the trans-mission of cosmic energy / consciousness is made by “human operators of synthesis”. They are educators of the future, catalytic agents in a Gen-ethics of trans-finite functions. They introduce not only a synthesis as a methodological tool, but also they *are* synthesis by themselves.

What **is** pedagogy of synthesis?

Pedagogy of “before”;

before a fall in fragmented knowledge,

before a professional distortion by specialised functions:

before life crystallised in a form.

Before depositing information,

they open the way to vision.

Principles, Functions and Tools of a New Message.

Realising inside what one wishes to make outside.

Human con-stellation of cosmic functions.

Trans-mission of social goods.

Human hologram

Key words in science of today:

evolution, information, irreversibility,

only a “half of the formula”;

the “other half” is: revelation, transcendence,

reversibility of values.

Beyond chemical clocks and cosmic pulsars, the alternate pulse of an ‘Atomic Heart’ is beating.

The soundless word of this heavenly Messenger has been replaced by materialistic rationalism and idealistic spiritualism.

But today,

between twilight of ancient gods

and birth of a new Sun,

a powerful current of knowledge runs in

the scene of history and calls all together

to a new dance of life.

University of Synthesis?

It is hard to find the proper word.

It is an Idea-symbol.

More than an institutional form

it is an energ-*ethical* wave charged with sense,

an intelligent force of the Message configuring

a new Gen-*ethical* code with human matter.
